Industry-led Consortia LOI Template

This document is being made available for planning purposes only. Your LOI must be submitted through the Grantee Portal.

Who Should Apply

This call is focused on bringing industry and academic researchers together to work collaboratively. Only collaborative projects will be considered.

- Collaborative projects for this call comprise groups of **3-4 laboratories** working around a common theme or target.
- Principal Investigators should be at the career level of an independent faculty member who leads an independent lab or industry equivalent. Research assistant professors, post-doctoral fellows, and staff are not eligible to be included as investigators.
- Investigator contributions must exceed access to biological samples, patients, and/or other scientific materials relevant for the project. Investigators are expected to contribute complimentary methods, techniques, and responsibilities towards the project.
- One Principal Investigator from the biotech/pharmaceutical industry must act as the Project Leader for this project.
- A Principal Investigator can **only participate in one LOI submission** .
- Principal Investigators who have two or more active competitive grants from Target ALS are not eligible to apply.

Experimental Plan

Accessing the RFA (Request for Application)

To read the RFA for this funding call, please navigate to the Target ALS website.

Project Title

Scientists Involved Expected Contribution (250 words)

> Clearly identify the scientists involved with a short paragraph about the expected contribution of each individual.

Scientific Objective (625 words)

> Define a set of scientific objectives (specific aims) with explicit milestones.

Impact Statement (125 words)

> Describe how the project will expand the ALS therapeutic landscape, supporting therapies against novel targets with approaches grounded in a deep understanding of disease biology.
